

Bioreasat[®] Pro

amira 

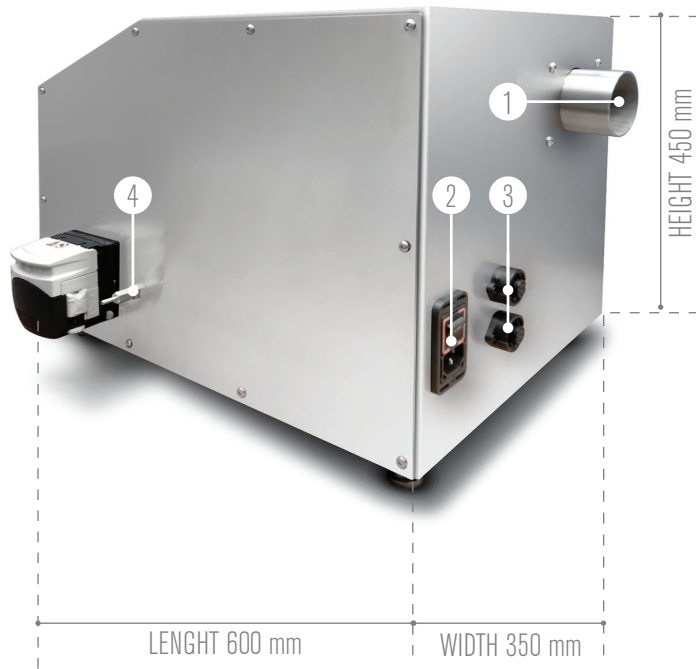

Bioreseat®

Pro

-  “Built in” version, really integrable in process equipment, designed to be on board in any isolator, pass-box, aseptic filling line machine and washing machine.
-  Ethernet communication with TCP/IP ModBus protocol to manage the unit.
-  Fully realized in AISI 316.
-  Precision peristaltic pump.
-  Easy to maintain.

The first
really
integrated
solution
for a VPHP
generator

- ① PIPE CONNECTION OUT.
- ② POWER SUPPLY.
- ③ CONNETTORS FOR T/RH% PROBE AND BALANCE.
- ④ H₂O₂ LIQUID INLET.
- ⑤ PIPE CONNECTION IN.
- ⑥ USB PORT.
- ⑦ ETHERNET PORT FOR REMOTE CONTROL.
- ⑧ PERISTALTIC PUMP.

Bioreset®

Pro

The most efficient solution for the bio-decontamination of process equipments, with the most complete hardware and software integration.

To establish a long term partnership with its customers Amira offers consultancy for a perfect Bioreset Pro integration and development/optimization of bio-decontamination cycles.

Bioreset Pro is completely managed from PLC through Ethernet connection. With this remote control it is possible to manage each component of the instrument and all the different functions as well as all the alarm signals.

The generator is very easy to maintain and it is adaptable to all customer needs.

OPTIONAL

- Catalyser for exhaust or return air.
- Special pipe dimensions on request.
- Safety devices for personnel safety.
- Cable for remote connection.
- T/RH% package for automatic cycle.
- Balance.

TECHNICAL DATA

Max treatable volume	max 500 m ³
Max pump rate	12 g/min
Airflow	Up to 200 m ³ /h adjustable
Remote control	Through PLC o SCADA or WiFi
Ø exit connection	60 mm
Materials	Stainless steel AISI 316
Power supply	220V / 50Hz or 110V / 60Hz
Dimensions (L x P x H)	350 x 600 x 450 mm
Weight	20 kg
